

Creating your scratch art designs...

You can create different effects by using different colours, creating different patterns...

...and by how hard you press down with your darker wax crayon.

Scratch Art

What you will need:

Method:

- 1) **Cut a piece of A4 card in half** (light colours will work best).
- 2) **Colour in your card with the wax crayons or felt tip pens.** You can do whatever pattern you want but brighter the better!
- 3) **Go over the top of your pattern with a dark wax crayon.**
- 4) Either **use your biro pen (take the inside out) or a pencil and scratch a design.** You could scratch your name, you could scratch a place you know or somewhere that you would like to be!
